Instructions

PURPOSE: This survey will assess hygiene and sanitation knowledge, attitudes and reported practices of students at school, and also student attitudes to gender, rights and marginalisation

INSTRUCTION: The survey should be conducted with 10% of the target student population by randomly selecting equal number of girls and boys from each class to complete the survey.

Teachers should be reminded of the importance of collecting accurate and unbiased data for the design of an effective hygiene promotion program, and should be encouraged to let students answer questions on their own, without prior coaching or assistance on the day.

Before conducting this survey enumerators need to agree on our Tok Pisin translations for key concepts - such as menstruation, child rights, disability, etc

TIP: If the school wants to conduct this survey themselves in the future and doesn't have access to M-Water then paper forms can be used, and manually updated into mWater for collation of results.

What is the name of this school? *

Please select the mWater site for this school

Name of interviewer. *

Interviewer is the person asking the questions.

Is the student being interviewed male or female? *

Male

Female

Introduction

TELL THE STUDENT: Provide some background information on the WASH in schools program. Explain the purpose of the interview - to learn more about student knowledge of hygiene behaviour, child rights, and opportunities or challenges for improvement

TELL THE STUDENT: All information taken will be kept securely. Remember that there are no right or wrong answers. We just want to know what your opinion is. Your response will be anonymous and will remain confidential.

Do you give permission to proceed with the survey?

Yes

No
